Bình Dương Hồ Chí Minh City

Education

Major: Information Technology

2022 - 2026

TRƯỜNG ĐẠI HỌC THỦ DẦU MỘT

Ranked as an "Excellent Student" for semesters, maintaining a top-tier academic record in Information Technology.

Kỹ năng

Self-Learning, Communication

Adaptability, Responsibility

Interest

+ Deep interest in cybersecurity and information security
+ Passionate about AI and AI-agent architectures and implementation

Career Objective

+ Dedicated and highly motivated Fullstack Intern with a strong foundation in the **MERN stack**. I am seeking to apply my knowledge of **React.js** for building interactive UIs and **Node.js/Express** for robust backend services
+ **NextJs** is other framework that i am currently working
+ My goal is to contribute to high-quality web applications while rapidly advancing my technical skills under professional mentorship to become a proficient Fullstack Developer.

Experience

Freelancer in NextJS Website **2024 - 2025**

Developing web applications using the Next.js framework and experimenting with multi-AI-agent systems.
Dedicating time to improving my English proficiency and gainning deeper understanding of AI

Fullstack Web Developer **2023 - 2024**

Family Store

Built a comprehensive E-commerce platform to streamline online sales and inventory management.

- **Frontend:** Developed a responsive user interface using **React.js**, implementing features like product filtering, a shopping cart, and a secure checkout process.
- **Backend:** Engineered a scalable server using **Node.js** and **Express.js** to handle RESTful API requests and authentication.
- **Database:** Designed and optimized a **MongoDB** schema to manage product catalogs, user profiles, and order history.
- **Management:** Built an Admin Dashboard to manage inventory, update product listings, and track sales performance in real-time.

Projects

Link: https://hospital-management-system-iota-blush.vercel.app/

2025 - 2026

Link github: https://github.com/dsdsluc/Hospital-Management-System.

+ Built with Next.js using client-side rendering and API integration
+ Database: PostgreSQL (in Neon)
+ Developed a web application that enables remote medical appointment booking while providing management features for patients, doctors, and administrators.

ITL Corporation Website Advertisement **2025 - 2026**

link: https://logistics-itl-layout.vercel.app/

+ Build html page for ITL company, which located in Binh Duong during internship time

+ Approach with the management system of logistic website.

Ecommercial Web Application (In development) **2024 - 2025**

Link github: https://github.com/dsdsluc/multivendor_ecommerce

+ Built with Next.js using **server-side rendering (SSR)**

+ Integrated external APIs including Clerk for authentication and Stripe for payment processing

+ Database: My SQL

Description: Developed an e-commerce platform that allows users to browse products, place orders, and make secure online payments.
